இவ்வுலகம் இல்லாகி யாங்கு (குறள் 247)

Dear Friends and Colleagues,

I am reaching out to you all through TIMA News, as usual, to share recent updates and activities.

On April 11, I had the privilege of participating in the inauguration of the new PPLSSS office at Dharmapuri, along with officials from the TNSB.

On April 13th, I participated in the Chithirai Thirunal festival at the Thiruvallur branch, along with Hon. Secretary Dr. Karthik Prabhu.

On April 22, along with Dr. Karthick Prabhu, Honourable Secretary, I participated in the Tamil Nadu Health Program meeting held at the Secretariat in Chennai under the leadership of Dr. Senthil Kumar, Principal Health Secretary, Government of Tamil Nadu. During this meeting, we discussed the introduction of the Human Papillomavirus (HPV) vaccine for young girls and women, and it was suggested to procure sufficient quantities of the vaccine to meet population needs.

On April 26, I had the honour of attending the State Conference of the Tamil Nadu Federation of Obstetricians and Gynaecologists held at Salem as a Guest of Honour. On the same day, the

Constitution Amendment Committee Meeting at Salem on 26.04.2025

Constitution Committee meeting was conducted at IMA Salem under the chairmanship of Dr. K. Prakasam, along with committee members. Various amendments were proposed and later reported during the State Council Meeting.

The following day, April 27, I had the privilege of inaugurating the new FSS office at Thiruvannamalai, and I also participated in the inauguration of the new PPLSSS office at Dharmapuri along with officials from the TNSB.

On May 1, the IMA Connect Program was conducted, where many branch secretaries took part, clarified their queries, and were encouraged to participate in future meetings.

The Financial Standing Committee (FSC) meeting was held on May 4 in Coimbatore, where the accounts of various IMA wings and schemes were thoroughly scrutinized.

Most recently, on May 9, we conducted an IMA Medico-Legal Webinar, where medical legal experts discussed important in getting consent with the patients, medico-legal cases and highlighted the significance of awareness and proper handling.

In conclusion, I kindly request everyone to focus on increasing membership in IMA, FSS and PPLSSS. Let us also actively promote teenage awareness, traffic safety, drug abuse prevention, and BLS programs in our communities.

ஒன்றுகூடுவோம், உயர்த்துவோம் இந்திய மருத்துவ சங்கத்தினை!

With Regards,

Dr. P. SENGUTTUVAN

President, IMA TNSB

STATE SECRETARY Message

Dr. S. KARTHICK PRABHU

Hony. State Secretary

Mobile: 94432 56147 | karthickprabhunhb@gmail.com

Dear colleagues,

Greetings from IMA Tamil Nadu State Branch!

Please find the updates since the last edition of our Newsletter:

- **19th of April:** We had our Internal Audit Committee Meeting at Coimbatore.
- **22nd of April:** We had our NHM Meeting at Chennai regarding HPV, Vaccination and other related issues. We also met the labour secretary and IG of police on the same day.
- **On 26th of April:** We had our Constitution Amendment Committee Meeting, which was arranged by IMA Salem in a nice way. We had lot of useful deliberations.
- **27th of April:** FSS office at Thiruvannamalai was inaugurated and our best wishes for them.
- **4th May:** We had our finance committee meeting at Coimbatore. We thank all the leaders and secretaries for the useful discussions.
- **9th May:** We had the conference of our junior doctor, Network, and installation of Office Bearers of both MSN and JDN at Chennai.

- **10th and 11th of**

May: We had the management committee meeting of PPLSSS and FSS at Kanyakumari. We thank Dr. M. Thiravium Mohan, Dr. S. Balaganraja and team for the wonderful hospitality and nice arrangements made.

- **15th of May:** Myself and President met certain officials for follow-up and also had the opportunity to inaugurate IMA Chennai Kauvery Vadapalani Branch. Our best wishes to the newly elected office bearers of the branch.

There are a lot of issues that needs to be settled, and we request all the newly elected office bearers to read TIMA News Letter and be update on the current issues so that they can guide our members in the right direction. Feel free to call us for any clarifications.

Long live IMA !

With warm regards,

Dr. S. Karthick Prabhu

STATE PRESIDENT ELECT

Dr. B. SRIDHAR

IMA State President Elect

Cell: 94433 26427

drsridharima@gmail.com

Dear friends and respected seniors

A month has gone by and again I have been given the opportunity to interact with you all. Thank God for the same

On 20.04.2025, I had the opportunity to visit Pollachi for a private event of a state office bearer but used the chance to have some useful discussion among the key office bearers

On 23.04.2025, I was part of the committee which visited Tirupur on an important issue which was successfully resolved thanks to the cooperation of the office bearers of the concerned branches.

On 26.04.2025, I was in Salem to participate in the Constitution committee meeting which came out with a few important amendment suggestions

to the state council under the able guidance of our senior leader Prakasam Anna

On 27.04.2025, We the key state office bearers attended the inauguration of the new team of FSS office at Thiruvannamali. I wish the new team led by Balagan Raja, Ganesan and Bharathi Selvam all success.

On 04.05.2025, I presided over FSC meeting in the presence of office bearers of various wings and schemes along with senior leaders. The accounting system has improved overall but for a few niggles and the internal auditing has been tightened. Elaborate FSC report shall be presented in the forthcoming SCM

On 10 & 11.05.2025 - MCM FSS and PPLSSS was held in a very useful way amidst ambient conditions and excellent hospitality. I congratulate Drs. Balagan Raja, Thiraviyam Mohan, Solomon Jaya and Kannan for the wonderful arrangements and an absorbing two days deliberations.

The state office is gearing up for the upcoming SCM following which there'll be announcement of election for key posts. I request all the branches to review and refresh their membership list and ensure maximum participation in the democratic process

With regards

Yours in IMA!

STATE FINANCE SECRETARY MESSAGE

Dr. S. Gowri Shankar

Hony. State Finance Secretary

Mobile: 77085 45554 | gsdrshankar47@gmail.com

Warm Greetings to everyone,

Best wishes to the new incoming team of FSS and PPLSS office bearers. Both of them have taken over from the previous team of office bearers and had an official ceremony of inaugurating new office in Dharmapuri and Thiruvannamalai respectively.

Constitution amendment committee meeting took place in Salem. The new amendments which were discussed will be presented in the next State Council Meeting. The next day State office bearers have attended the Inauguration of New Office function in Thiruvannamalai. The new office is nicely set up and wishing the new team to excel in their activities.

Financial Standing Committee took place in Coimbatore in the first week of May and this time the attendance is maximum. All the accounts have been verified and the official report will be presented by the FSC Chairman in the SCM.

Management Committee Meeting of PPLSS and FSS schemes took place in Kanyakumari. Thanks to the hospitality shown by the host branch and the meeting was planned and conducted well.

Next month SCM will be in Kodaikanal conducted by Dindigul, Ottanchatram, Palani, Vathalagundu and Kodaikanal Branches. We welcome all the State Office Bearers, Branch President, Secretaries and all the State Council Members to the meeting.

We will be having our State elections soon so we request all the Branch office bearers to update their branch members list with their phone numbers and email addresses and send it to the State office before July 15th.

UNITED WE WIN !

Yours

Dr. S. Gowri Shankar

Introducing Electrical Needle Syringe Destroyer (ENSD)

Your Partner in Safe & Sustainable Biomedical Waste Management

Automatic
Rs. 3750
+ GST

Portable / Durable / User Friendly

Why Invest in HYGIEA ENSD?

- Instant destruction of needles and syringes – within seconds
- Eliminates recapping or storing in chemical containers
- Protects Healthcare workers and Patients from risk of HIV, Hepatitis B & C Infections
- Reduces chance of Cross infections, Antibiotic resistance and use of costly antibiotics
- Aligned with modern Biomedical Waste Management protocols
- Avoids recurring purchases of sharps container's and saves storage space
- Perfect for Hospitals Clinics & Labs & Veterinary practices

SAFE DISPOSAL OF BIOMEDICAL WASTE IS MORE CRUCIAL today than ever before as Global warming is fuelling spread of New Unknown Microbial Infections in the Environment.

It is Important to Protect all Lives (Human, Animal, and Plants) and safeguards our Air, Water, and Soil from microbial contamination.

Make the Smart Choice. Invest in Safety. Invest in Sustainability. Invest in Hygiea ENSD.

Respected IMA TNSB leaders and Members, Greetings.

The aim of IMA CGP is to enhance the knowledge and skills of the General Practitioners (GPs) through educational initiatives, including Fellowship programs and other academic activities, ultimately improving the quality of healthcare. Accordingly, IMA TNSB CGP is conducting few fellowship courses for the benefit of its members with the latest trend in the modern medicine by the eminent faculties in the particular field. We request the General Practitioners to get benefited through attending the short-term courses, in a very meager amount of payment Rs. 29500/- (Incl 18% GST) only. Criteria to join CGP courses: IMA Membership (the IMA branches can be approached) & IMA CGP Membership (Contact the State Office-Fee Rs. 1180 incl 18% GST).

The Fellowship Course in Respiratory Diseases is being conducted with 17 candidates by its Coordinator Dr. V. Nandagopal by on and offline classes. The Fellowship course in Diabetology going on with 70 candidates. The next offline class on 25-05-2025 at JVL Plaza, Teynampet, Chennai. The Fellowship course in Sexual Medicine is going on with 10 candidates by its Coordinators Dr. M. Balasubramanian and Dr. NarAyana Reddy.

Fellowship course in Infectious Disease and Infection Control will commence in June 2025. It is the Fellowship programme with a lot of Faculties in different specialties. It will have few offline classes at Coimbatore and fortnightly online classes as well.

Course fee Rs.29500/- (incl. GST) and the course duration 6 Months. Course Coordinator Dr. K. Neminathan.

A new Fellowship course "Fellowship certificate course in "Office practice Neurology & Emergency" will commence on June 2025. Course Director is Dr. N. Balamurugan, MD. DM., Salem. Duration is for 10 months. Classes: Once in a month: Hybrid format. Direct contact classes in Salem, once in a month, on Sundays (9 am to 1 pm) with lunch. One Class at Yercaud - Month and date to be finalized. Simultaneous zoom transmission for distant learners. Online classes - Twice in a month, Second and third Thursdays 8 pm to 10.00 pm, course will commence soon. Interested candidates can apply soon. The course fee is Rs. 29500 (incl GST). Eligibility: IMA membership and IMA CGP membership.

The other Fellowship Courses in the pipeline is Diabetic Foot Care & Reproductive Medicine etc.

As per the resolution passed in 309th SCM held on 18 July 2021, at Heritage Madurai, if anybody failed in the CGP courses and if the attendance is >80%, they can reappear by paying Rs. 5000/- as exam fee. If the attendance is <80%, they have to attend the classes again paying 50% of the total fee. GST applicable.

We encourage IMA branches to start with CGP Sub faculty, consists of 20 CGP members.

Time to time CME programme is being conducted by the CGP wing, the members are requested to participate and subsequently benefited by a credit hour.

- COURSE FEE RS. 35400/- Incl GST.

COURSE DIRECTOR:

Dr. V.R. RAVI, M.S., (Orthopedic Surgeon),
Mobile: 98424 26141

SLEEPMEDIMA-2025

A short-term Fellowship course in Sleep Medicine

**Course Commences on:
01 week of July 2025**

OFFLINE COURSE @
MGM Healthcare, 72, Nelson
Manickam Road, Aminjikarai, Chennai-29

**Last date for receiving
Applications:
15-06-2025**

COURSE HIGHLIGHTS:

1. To learn all Sleep Disorders 2. Levels of Sleep Study (Polysomnography) 3. Positive Airway Pressure Therapy and Non PAP Therapy. 4. Case based multi disciplinary discussion with experts in Sleep Medicine and Sleep Surgery. 5. Workshop on Dental Sleep Medicine. 6. Pediatric Sleep Disorders

ELIGIBILITY CRITERIA:

Must be a IMA life member/AMS member
During or after post graduation in Pulmonology, ENT, Psychiatry Neurology, Dentistry, Paediatrics,
Internal Medicine and Allied Sciences like Endocrinology and Diabetology.

COURSE FEE RS.35400 (INCLUDING GST). COURSE DURATION 6 MONTHS

BANK ACCOUNT DETAILS TO MAKE PAYMENTS:

A/C Name: Indian Medical Association AMS, A/c No.75260100001890, Bank of Baroda,
Ramnagar br. (Coimbatore), IFSC Code: BARBORAMNAG (5th ch. is Zero

FILLED APPLICATION IS TO REACH THIS OFFICE BY 15-06-2025, TO THE FOLLOWING ADDRESS

Dr. S. KARTHICK PRABHU, Hony. State Secretary-IMA TNSB, IMA TN HQs. No. 1, Doctors Colony 2nd Cross St.,
Bharathidasan Nagar Extn. Tambaram West, Chennai-600 045.

Respected Leaders and State Council Members, Greetings.

The academic year 2024-25 for the Paramedical Courses is about to end by June 2025. The final examination will be held from 10-06-2025 to 17-06-2025. Around 2000 students will be writing examinations in different common examination centers. Institutions have been geared up to cover the syllabus within the prescribed time as per the Term plan given. The model exam is being conducted since 19-05-2025. We have sought the help of the IMA Branch Presidents and Secretaries to make an arrangement to conduct examinations in the IMA Halls/Hospitals smoothly.

Regular online classes are going on every Thursday from 1PM to 2.00 PM. Paramedical institutions are helping us in conducting the online classes regularly, we thank them. Senior faculties are taking class through Zoom online link, which is very useful to all the students.

There are 25 New Institutions, given affiliation to start paramedical colleges in 2024-25, after due inspection and signing MOU. There are around 20 new institutions applied for affiliation for the year 2025-26, for which the necessary inspection and other formalities are going on. Renewal of the accreditation also going on. No institution is allowed to conduct the courses without proper approval/accreditation/Renewal.

As we are implementing GST since Dec 2024, the institutions were requested to pay the fee along 18% GST.

The NHB Hospitals are encouraged to start the

Paramedical courses in their hospitals by their own or pooling few hospitals together. Any IMA branch by pooling their clinical resources together and having common academic teaching institution can also apply to start Paramedical courses. The fee collected are very minimal, so as to support the poor students' able study these professional courses and stand on their own feet.

Registering the Paramedical Courses is a simple procedure, to be followed by filling the format available in the website "imatnparamedical.com", make necessary payment and send it to the IMA TNSB State Office at Tambaram West. Further course of action will be intimated by the State Office. The Paramedical institutions are requested to enroll the students now onwards, so as to start the course in a prescribed time. The students and the parents are to be explained that the courses conducted by IMA TNSB Paramedical Wing is based on the curriculum of IMA TNSB and the passed-out students can be employed in the Nursing Home Hospitals of IMA / Private Hospitals only.

The Principal of Van Allen Hospital IMA Paramedical Institute Mrs. Punitha, passed away on 15-05-2025. We offer our heartfelt condolences to the grieving family. May the almighty God console the family. May her soul rest in peace.

Paramedical Wing Website 'imatnparamedical.com' is being updated, one can visit the site know the details of the Paramedical Wing. The State Office may be approached for any requirement of clinical staff passing out from the IMA Paramedical Institutions. ●

Dear Friends,

Greetings from NHB, IMA TNSB.

Due to continuous work by our NHB and HBI the fire licence renewal is extended to three years now. The order was published in the previous TIMA News Letter. Please insist your district fire officers when you are renewing it. Also we are sharing the revised guidelines for fire safety given by our past Health Secretary Dr Radhakrishnan in this issue. Please recheck your hospital electrical and fire safety measures. Update them if necessary. Also fill all fire extinguishers. Regular mock drill for fire safety is necessary.

Many of our friends are enquiring about BMW disposal and its rates. We are sharing the MOU with BMW handlers in the NHB WhatsApp group. We are also discussing with them regarding the software insisted by PCB. Soon we will share the recommendations.

Another important area is POSCO act. The guidelines are shared in the previous TIMA issue. Please follow them carefully whenever you come across any suspicious case.

Soon we are expecting the order from minimum wages revision committee. Hope this will give us relief.

We are updating the records of our NHB members regularly. You will again receive a call from our office regarding your phone, mobile numbers, email id and bed strength. Please give them proper reply. Dear NHB District coordinators, IMA Branch Presidents and Secretaries - motivate all new hospitals in your area to become members of NHB. Also followed by HPS (Hospital Protection Scheme) of PPLSS, IMA TNSB.

Soon we are expecting Insurance Redressal Forum in our State level. Dr. S. Karthick Prabhu and myself will be members in that. Till then any issues regarding Insurance contact us.

Maintain records properly. Do an ethical and safe practice.

Maintain your accounts properly. Check your all account books and software's regularly. Avoid pilferages.

Together we win.

HEALTH AND FAMILY WELFARE (E2) DEPARTMENT

Letter (MsI.No.138, Dated 25.04.2022)

From

Dr. J. Radhakrishnan, I.A.S.,
Principal Secretary to Government

To

All Heads of Departments, Health and Family Welfare Department,
Chennai. (with a request to communicate to their subordinates).
The Secretary, National Medical Commission, New Delhi-77.
The Secretary, Housing and Urban Development Department, Chennai-09.
The Member Secretary, Chennai Metropolitan Development Authority, Chennai-8.
The Director, Directorate of Town and Country Planning, Chennai-102
The Director, Tamil Nadu Fire and Rescue Services, Chennai-6
The President, Indian Medical Association, Perundhurai Road, Erode-638009.
Tamil Nadu Nurses and Midwives Council, Chennai-04
Tamil Nadu Dental Council, Chennai-107.
The Chief Engineer and Engineer in Chief (Buildings), Chepauk, Chennai-05.
The Chief Commissioner for Persons with Disabilities, Ministry of Social Justice and Empowerment, New Delhi-1
All Private Hospitals (through Director of Medical and Rural Health Services, Chennai-6).

Sir,

Sub : Hospital Buildings - Guidelines for fire safety arrangements in Hospital Building - Revised Guidelines issued.

Ref : 1. Interim Orders of Hon'ble High Court of Madras in W.P.No.30367 of 2015, dated 21.04.2016.

2. Government letter (Ms) No.185/E2/2016, Health and Family Welfare Department, dated 15.07.2016.

3. Government letter (Ms) No.211/E2/2016, Health and Family Welfare Department, dated 30.08.2016.

4. Interim Orders of Hon'ble High Court of Madras in W.P.No.30367 of 2015, dated 07.04.2017.

5. G.O.(Ms).No.118, Health and Family Welfare Department, dated 20.04.2017

6. G.O.(Ms).No.328, Health and Family Welfare Department, dated 03.08.2018.

I am directed to state that in the reference second and third cited, guidelines for fire safety arrangements in hospital buildings have been issued.

2. Based on the orders of Hon'ble High Court of Madras in the reference fourth and fifth cited, the State Level Expert Committee on Fire Safety Arrangements in Hospitals was constituted to inspect and monitor the fire fighting arrangements in Hospitals and Medical centers both Government and Private in the State of Tamil Nadu. The Committee has submitted its final report and have recommended certain general and specific guidelines to be adopted in all the hospitals.

3. The Government, after examining the recommendations of the State Level Expert Committee on Fire Safety Arrangements in Hospitals have decided to revise the guidelines for fire safety arrangements in hospital buildings already issued in the reference second and third cited and accordingly issues the fresh guidelines as annexed with this letter for strict compliance.

Yours faithfully,

Sd/-

for Principal Secretary to Government.

**Annexure to Government letter (Ms). No.138, Health and Family Welfare
Department, dated 25.04.2022
Guidelines for fire safety arrangements in hospital buildings**

General Guidelines:-

- (i) Provision of ramp, wherever possible, subject to availability of space, structural stability of the building etc may be provided.
- (ii) Wherever there are multiple buildings (Group Developments) in one campus, provision of ramp in one building with connecting corridors to the other buildings, leaving enough head room for snorkel, subject to availability of space, structural stability of the building etc may be provided.
- (iii) The minimum width of ramp can be allowed above 1.5 metre (ideally 2.1 metre) and minimum gradient of ramp can be 1 in 8 wherein the gradient of 1 in 12 is ideal.
- (iv) Wherever possible, subject to availability of space etc provision of setback / space all around the building with access to outlets / windows for fire fighting vehicles to operate may be provided.
- (v) If provision of setback as stated above is not possible, minimum of two gates with approach roads on opposite sides of the building have to be provided, wherever possible, taking into account the location of the building etc for easy movement of vehicles during an emergency. Emergency / fire exits which are already existing has to be periodically monitored to ensure free movement at any time.
- (vi) Wherever possible, fire service lifts with alternate power supply outside the building is to be provided. If possible, one of the existing lifts can also be converted as Fire service lift.
- (vii) Wherever possible, pressurization of existing staircases may be provided.
- (viii) Wherever the fire safety methods mentioned above cannot be provided due to practical difficulties, alternate fire fighting arrangements as suggested by the Fire Service Department, based on the requirement of a particular hospital building, to be provided. The institutions may consult the fire service department in such circumstances.
- (ix) Minimum of two large, 'Louvered Windows' (with adequate safety provision) may be provided in each floor wherever the building is fully glassed, for easy evacuation of persons, wherever possible.
- (x) Fire fighting training may be given for selected employees. This can be made mandatory. The hospital administration must approach the Fire Service Department for imparting such training.
- (xi) Regular mock drills to be conducted every six months and this has to be made mandatory.
- (xii) All Government/ private Hospitals shall display in various places declaration enlisting the fire safety measures and escape routes provided in the hospital. This declaration should be displayed on a board in Tamil and English. This provision is to be made mandatory.
- (xiii) The material used for partitions, false roofing and interior decorations etc., may be of fire resistant and non combustible nature.
- (xiv) Computer main Server room should have total flooding system with clean agent for fire suppression. In respect of UPS battery backup rooms, they shall be properly ventilated by means of mechanical ventilation.
- (xv) Diet kitchen department should be properly ventilated with proper exhaust hoods
- (xvi) Fire Safety / emergency Care contact Numbers should be displayed in all wards like Fire Station, nearby police Station etc.
- (xvii) For hospital building above Ground+2, the hospital management concerned has to do a self appraisal annually with respect to the preparedness in the eventuality of disaster.
- (xviii) Disaster Management plan should be kept ready by every hospital and skill training from certified/authorized agencies for Disaster Management has to be imparted to all hospitals.
- (xix) The Hospital authorities shall ensure the presence of local Fire Officer with team during mock and evacuation drills. It is compulsory as per the National Building Code of India Part - IV Fire and Life Safety.
- (xx) Since in-built Fire Safety systems like Portable Fire Extinguishers, Hose reels, Down Corner, Wet riser, Automatic sprinklers & Detectors, Manual Call Points and Yard Hydrant systems are all made up of Iron and need to be tested and maintained periodically (weekly, monthly, bi-months etc.,) the need for Tamil Nadu Fire and Rescue Services Department personnel conducting inspection at least once in a year is crucial and should be done at each renewal.
- (xxi) Terrace floor be not allowed "for any other activity since it has to be kept vacant. It is also a pathway for easy evacuation of patients in case of any fire or any other emergency in the intermediate floors.
- (xxii) The fire command / disaster management cell is to be made in all the institutions so as to rise upto the occasion in case of emergencies. The fire command cell shall have the main fire alarm panel with suitable Public address system. Details of all floor plans along with the details of fire fighting equipments and installations shall be maintained in this centre.

(xxiii) The provision of hand rails, use of anti-skid tiles and reflector strips, may be advised at the time of issuing planning permission itself.

(xxiv) Vulnerable sections like Operation theatre, Intensive care units, Critical care units, Paediatric Units, Neo-Natal ward, Trauma Care, Geriatric, Gynaecology and Labour Wards may be placed in lower level of multi storied hospital buildings for easy evacuations during emergency.

(xxv) Diesel Generator, Central Stores, Central Sterile Supply Department, Steam Autoclave Machines, Laundry with boiler, Diet Kitchen with gas cylinders may not be kept in basement.

Because of practical limitations in respect of existing hospitals, the Department of Fire and Rescue services may decide and suggest the best way possible to ensure fire safety in those hospitals where space is a constraint.

Specific guidelines in respect of high rise buildings:-

Upto G+3 or Stilt + 4F	Provision of ramp in case of availability of space to be considered taking into consideration of setback space and building stability. If there is no space for new construction of ramp, then alternate Fire safety measures such as Fire Hydrant system are to be in place as per specifications of the Department of Fire and Rescue services. One of the lifts can be made stretcher and fire lift with 4 hours fire rating with alternative power supply. One of the staircases should be pressurized and also Large Louvered Windows shall be provided on each floor abutting the road side wherever possible.
G+4 F and above	Provision of Ramp has to be considered. If no space is available or the building stability is in question, other arrangements like Fire Hydrant with Sprinklers system and other fire fighting arrangements have to be made. Advise and directions to be sought from Department of Fire and Rescue services on a case to case basis. One of the lifts can be made stretcher and fire lift with 4 hours fire rating with alternative power supply. One of the staircases should be pressurized and also Large Louvered Windows shall be provided on each floor abutting the road side wherever possible.

NOTE:

- High Rise Building - A building 15 m or above in height (irrespective of its occupancy)
- Any changes in travel directions in ramp shall be preceded by landings of 1.5 meter x 1.5 meter size.
- No external staircase shall be inclined at an angle greater than 45 degrees from the horizontal.
- a. High rise buildings (Permissible maximum height for Hospitals is 45 metres) and buildings with floor space more than 300 sq.m per floor should be allowed to operate only after getting prior Compliance Certificate from Department of Fire and Rescue services and Completion Certificate from Chennai Metropolitan Development Authority / Directorate of Town and Country Planning.
- b. In case of other High Rise Building category, Department of Fire and Rescue services has to issue Planning Permission /No Objection Certificate and Fire licence.
- c. In Non-High Rise Building - Jurisdictional District Officers of Fire and Rescue Services may issue Planning Permission /No Objection Certificate / and Fire Licence.

BASEMENTS IN THE CASES OF HIGH RISE HOSPITAL BUILDINGS:

In respect of High rise Hospital buildings, the provisions contained in Development Control Rules and General BIS requirements of National Building Code of India, 2016 may be taken into account. The provisions states as follows:

- The basement shall not be used for residential purposes.
- The construction of the basement shall be allowed by the Authority in accordance with the laid use and other provisions specified under the development control rules.
- The following uses shall be permitted in the basements - (a). Storage of household or other goods of ordinarily non-combustible material; (b). Strong rooms, bank cellars etc.; (c). Air conditioning equipment and other machines used for services and utilities of the building and (d). Parking spaces

The Authority may also consider permitting mercantile occupancy as well as institutional occupancy for medical, health care services involving radiation facilities in the first basement subject to compliance of all requirements for fire safety, in accordance with 'Fire and Life Safety' of the Code and necessary measures for required lighting, ventilation and water supply, drainage and sanitation.

The basements can be permitted below the ground and beyond the building lines at ground level, subject to a clear minimum front margin of 4.5 metre, and side and rear margins of 3 metre, and further subject to non-habitable uses and provision for mechanical ventilation and all safety provision and drainage. However, it is essential that the basement top slab below the external circulation at ground level should be designed for fire fighting vehicular loads.

The Basement shall have the following requirements:

- a) Every basement shall be in every part at least 2.4 metre in height from the floor to the underside of the roof slab or ceiling.
- b) Adequate ventilation shall be provided for the basement. The ventilation requirements shall be the same as required by the particular occupancy. It may be met by providing adequate mechanical ventilation in the form of blowers, exhaust fans, air conditioning systems, etc.,
- c) The height of the ceiling of any basement shall be minimum 0.9 metre and the maximum 1.2 metre above the average surrounding ground level. However, in case of parking, mercantile or business occupancy at ground floor, minimum height of the ceiling of the basement may be 0.3 metre above the average surrounding ground level subject to mechanical ventilation, being provided.
- d) Adequate arrangement shall be made such that, surface drainage does not enter the basement
- e) The walls and floors of the basement shall be watertight and be so designed that the effects of the surrounding soil and moisture, if any, are taken into account in design and adequate damp proofing treatment is given.
- f) The access to the basement shall be separate from the main and alternative staircase providing access and exit from higher floors. Where the staircase is continuous in the case of buildings served by more than one staircase, the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors.

The Exit requirements in basements shall comply with the provisions of 'Fire and Life Safety' of the Code.

- Basement shall not be used to store flammables or for pathological or other laboratories, particularly those involving usage of chemicals.
- Aisles, corridors, ramps, etc, through which patients are moved, shall have a minimum width of 2.4 metre throughout. Aisles, corridors and ramps in other areas not intended for the housing, treatment or use of inpatients shall be not less than 1.5 metre in width.

FIRE EXIT PLAN:

Fire exit plan shall meet the requirements of National Building Code of India under Fire and Life Safety.

- a. Fire safety measures and escape routes provided in the Government Hospitals/Private Hospitals should be displayed in various places in both Tamil and English.
- b. Every exit, exit passage way and exit discharge shall be continuously maintained free of all obstructions or impediments so as to put in full use in case of fire or other emergencies.
- c. A common path of travel is desirable in exit access which leads to two independent directions to separate exits.
- d. The minimum required number of exits in a building shall be determined based on occupant load and the width required per person as per National Building Code Norms.

Hospital Lift : National Building Code of India (part 8) in Building services discusses about hospital lift .

Hospital Lift : A lift normally installed in a hospital, dispensary or clinic and designed to accommodate one bed or stretcher along its depth, with sufficient space around to carry a minimum of three attendants in addition to the lift operator.

This shall be read with "Fire protection Requirements for lifts" prescribed in National Building Code of India (part 8), Building services — and the same shall be adopted in Hospital lifts in consultation with lifts Licensing Authority. The code prescribes the Fire protection requirements of Lifts in High Rise Buildings as follows:

Buildings of Height 15 metre and above:

- a) All materials of constructions in load bearing elements, stairways and corridors and facades shall be non-combustible.
- b) The interior finishing materials shall be of very low flame spread type.
- c) Walls of the lift bank well enclosure for a lift, or group of lifts shall have a fire rating of 120 min. The lift well shall have a vent at the top, of area not less than 0.2 m² per lift.
- d) Landing doors — Lift landing doors shall be imperforate. Collapsible doors shall not be permitted. Lift landing doors provided in the lift enclosure shall have a minimum fire resistance rating of 60 min.
- e) Lift car door — Lift car doors shall be imperforate. Collapsible car doors shall not be permitted.
- f) Telephone or other communication facilities shall be provided in the lift car and the lift main lobby. Communication system for lifts shall also be connected to the Fire control room of the building if provided.
- g) Photo luminescent safety signs shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall have the plan of the respective floor showing location of the stairways. The plan shall also indicate the direction to and the level of refuge area. All signs posted and maintained on every floor of buildings open to and used by the public shall comply with the requirements of accessible signage given in 13 of Part 3 'Development Control' Rules and General Building Requirements' of the Code.
- h) All lifts (fireman's lifts I non fireman's lifts) shall be provided with phase I operation as per 7.1.1 (k) (x) (grounding operations)

- i) The grounding operations may be initiated by individual switches for lifts or a common switch for a group of lifts or by a signal from fire alarm system of the building if available.
- j) Fireman's lift - The fireman's lift is provided in a building for the purpose of aiding fire fighters in evacuating trapped persons in the building and to take the requirement for fighting fire to upper levels with minimum delay. Some lifts out of all the lifts shall be identified as fireman's lifts.

The number of required fireman's lifts and their locations in a building will vary depending on the size, design, complexity of the building. Some considerations are as follows:-

- It is advisable to have at least one fireman's lift per building
- If there are multiple wings in the building there can be at least one fireman's lift per wing
- If there are multiple banks of the lifts in the building there can be at least one fireman's lift per bank of lifts.
- If the building height is up to 45 metre and it is zoned height wise and it does not have single fireman's lift serving every floor of the buildings, then there shall be at least one fireman's lift per zone which shall serve the main level / fire access level and shall serve all the landings in the respective zone.
- If the building height is more than 45 metre and it does not have any single fireman's lift serving all the floor, that is, it has all lifts only in respective zones the fireman's lift shall be provided in each zones separately, serving all landings in respective zone, with a transfer landing for transferring from one zone to another.
- Considering all the above, the fireman's lifts shall be identified on the building plan and duly displayed in the Fire Command Centre.

To be effective in fire fighting operation, the fireman's lift shall have following requirements.

- i) The fireman's lift may be used by the occupants in normal times.
- ii) The fireman's lift shall be provided with fireman's switch. The switch shall be a two position (ON / OFF) switch fixed at the evacuation floor (normally main entrance floor) for enabling the lift to be put into fireman's mode. The switch shall be situated in a glass - fronted box with suitable label and fixed adjacent to the lift at the entrance level. When the switch is on, landing call - points shall become inoperative and the lift shall be on the car control only or on a priority control device. When the switch is off, the lift will return to normal working.
- iii) The fireman's lift shall be provided with an audio and visual signal in the car.
- iv) The fireman's lift shall have a floor area of min. .43 m². It shall have loading capacity of not less than 544 kg (8 persons lift).
- v) The fireman's lift shall be provided with power operated (automatic) doors of minimum 0.8 m width.
- vi) The speed of the fireman's lift shall be 1.0 m/s or more such that it can reach the top floor from main floor / fire fighter access level within 1 min. In case the building is zoned, the fireman's lift shall operate from the lowest served landirt to the topmost served landing in 1 min. Note: - Notwithstanding the above, the speed of lifts shall be established based on (iv).
- vii) Reliable alternative source of power supply should be provided for all fireman lifts through a manually / automatically operated change over switch. The route of wiring shall be safe from fire.
- viii) Suitable arrangements such as providing slope in the floor of lift lobby shall be made at all the landing, to prevent water used during fire fighting from entering the lift shafts.
- ix) The words 'Fireman Lifts' shall be conspicuously displayed in fluorescent paint on the lift landing.
- x) Operational requirements of fireman's lift - The lift shall be provided with the following operational controls, phase I and phase II.

a) Phase I - Return to evacuation floor shall start when the fireman's switch at the evacuation floor is turned to the 'ON' position or the signal from smoke detector (if provided by the Building Management System) is on. All lifts controlled by this switch shall cancel all existing car calls and separated from landing calls and no landing or car call shall be registered. The audio and visual signal shall be turned on. All heat and smoke sensitive door reopening devices shall be rendered inoperative.

If the lift is travelling towards the evacuation floor, it shall continue driving to that floor.

If the lift is travelling away from the evacuation floor, it shall reverse its direction at the nearest possible floor without opening its doors and return non-stop to the evacuation floor.

If the lift is standing at a floor other than the evacuation floor, it shall close the doors and start travelling non-stop to the evacuation floor.

When at the evacuation floor, the lift shall park with doors open. The continuous audio signal is turned off after this return drive.

Note — If the building is designed for alternative evacuation floor, in case of fire at main floor the lifts shall park at the alternative evacuation floor with doors open.

b) Phase II — Operation of the lift shall be as defined below - The phase-II is started after phase I, if the fireman's switch is 'ON'.

If the lifts are grounded by the smoke detector signal, for phase II to being it shall be necessary to turn the fireman's switch 'ON'. The lift does not respond to landing calls but registers car calls. All heat and smoke sensitive door reopening devices are rendered inoperative.

When the car call button is pressed, the doors start closing. If the button is released before the doors are fully closed, they re-open. The car call is registered only when the doors are fully closed.

After registered a car call, the lift starts driving to the call. If more than one car call is registered, only the nearest call is answered and the remaining calls will be cancelled at the first stop.

At the floor the doors are opened by pushing the door open button. If the button is released before the doors are fully open, they re-close.

The lift returns to normal service when it stands at the evacuation floor with doors open and the switch is turned 'OFF' thereafter.

The operation of fireman's lift shall be by means of a full set of push buttons in the car. Other operating system shall be rendered inoperative.

To sum up, the National Building Code of India part IV Fire and Life Safety prescribes various inbuilt systems depending upon various requirements like water based, powder based, foam based, extinguishing media, gas suppression systems including total flooding system in server rooms, UPS area, Machinery area, Oxygen plant etc., Hence the State Expert Committee to take note of these.

ELECTRICAL INSTALLATIONS:-

The following guidelines should be followed in respect of Electrical installations:-

1. As per Tamil Nadu Electricity Distribution Code Regulation 29 (14)(b), the point of supply shall be within 30 meters from the main gate easily accessible and visible and satisfactory with regards to security aspects.
2. As per Tamil Nadu Electricity Distribution Code Regulation 30 (9), All High Tension installations and their associated medium voltage and low voltage installations will have to comply with the applicable safety and security rules prescribed by Authority / Government / Commission. The High Tension /Extra High Tension service connections were effected only after obtaining the Safety Certificate from Chief Electrical Inspector to Government (CEIG).
3. LT supply for Multi-Storied buildings of more than 15 meters in height at the voltage upto 650V and HT supply for the electrical installations of voltage exceeding 650 Volts including Multi-Storied buildings of more than 15 meters in height shall be effected only after obtaining inspection certificate issued by the competent authority (inspection certificate from CEIG) in accordance with the G.O.(Ms)No.59 dt.14.08.2014 issued by the Government of Tamil Nadu. For other cases, the CEIG inspection certificate shall not be insisted as per the TANGEDCO letter dated 01.03.2018.
4. TANGEDCO in the letter dated 23.12.2015 has given an advisory to Government departments as follows which is to be noted.
 1. In future, new service connections will be given only if power room/generator room, RMG/RMU, Metering sets and panels are installed only at ground floor level at a higher elevation of atleast 3 feet from- ground level in all Domestic, Commercial and Industrial establishments, complexes and multi-storeyed building. Installation of such equipments at basements should be discouraged in the public interests to avoid inconvenience and hardships during rains or floods.
 2. The local bodies and planning authorities are requested to give an advisory to all the Domestic, Commercial and Industrial establishment, complexes and multi-storeyed buildings that in future the power room/generator room, RMG/RMU, Metering sets and panels should only be installed at the ground floor level at a higher elevation of atleast 3 feet above ground level and not at the basement. The concerned authorities shall also ensure that all the consumers comply with this requirements before issue of completion certificate in order to avoid damage to electrical equipments and consequent power interruptions during rains or floods.
 3. As per the Tamil Nadu Electricity Distribution Code Regulation 29 (10), "In all storied buildings irrespective of the number of floors, service connections (whether through overhead wires or through under-ground cables) will be effected normally at the ground floor. In areas that are prone to floods, the height of the meter shall be raised at a level as may be determined by the Engineer."

OTHER ARRANGEMENTS :

All buildings depending upon the occupancy use and height shall be protected by fire extinguishers, hose reels, wet riser, down-comer, yard hydrants, automatic sprinkler installation, deluge system, high/medium velocity water spray, foam, water mist systems, gaseous or dry powder system, manual/automatic fire alarm system, etc, in accordance with the provisions of various clauses as applicable.

For easy transportation during evacuation process, patient cots have to be provided with wheels (with brake system) especially in high dependency units such as ICU, IMCU, Post Operative Wards, Orthopaedic wards, Paediatric wards.

1. These fire extinguishing equipments and their installation shall be in accordance with accepted standards. The extinguishers shall be mounted at a convenient height to enable its quick access and efficient use by all, in the event of a fire incidence and shall be maintained periodically so as to ensure their perfect serviceability at all times.

2. **Static Water Storage Tanks and Pump House** - A satisfactory supply of water for the purpose of firefighting shall always be available in the form of underground/terrace level static storage tank with capacity specified for each building with arrangements or replenishment.

3. **Automatic Sprinkler Installation** - Automatic sprinklers shall be installed - wherever required, throughout the building in accordance with good practice. Automatic sprinklers shall be installed in false ceiling voids exceeding 800 mm in height.

4. Firefighting equipment shall be suitably located and clearly marked by luminous signs.

5. Institutional Buildings — Major Hospitals

a. Fire Prevention - No combustible material of any kind shall be stored or used in any building or section thereof used for institutional occupancy.

b. Principle of progressive horizontal evacuation is of paramount consideration for hospital patients particularly those lacking self preservation.

c. All critical patients and those incapable of self-preservation and having physical impairment shall be housed within 30 metre height.

d. Other types of patients and occupancies incidental to the hospitals such as consultation rooms, nurses' stations, medical shops, canteens, etc may be housed at heights beyond 30 metre but not more than 45 metre.

e. Basement shall not be used to store flammables or for pathological or other laboratories particularly those involving usage of chemicals.

f. Operation theatres, delivery rooms, Intensive care units, recovery rooms, etc, that containing patients lacking self preservation in case of emergencies shall be fire/smoke separated (120 min minimum rating) from all the adjoining areas.

g. Aisles, corridors, ramps, doors, exits etc, through which patients are moved, shall have a minimum admissible width.

h. Floor surface of corridors shall not be inclined at a gradient steeper than 1 in 12 to the horizontal.

i. Storage of flammable liquids in laboratories or in any other area shall be not more than 3 litre for every 10m² area.

As per Tamil Nadu Pollution Control Board :

- Tamil Nadu Pollution Control Board enforces the standards prescribed for Diesel Generator sets as per the Environment (Protection) Rules, 1986 and the final guidelines issued by Central Pollution Control Board, dated 25.02.2015.

- In case of violation by the hospitals, no penalty is collected. However, legal procedure will be followed and direction for closure and disconnection of power supply will be issued under section 33A of the Water (Prevention and Control of Pollution) Act, 1974 as amended and under section 31A of the Air (Prevention and Control of Pollution) Act, 1981 as amended.

ADVANCED FIRE SAFETY METHODS / ARRANGEMENTS

In addition to conventional fire safety provisions these advanced fire safety methods and systems can also be considered as technological advancements. These advancements may well be put in use considering the superiority in combating emergencies.

Roll on Ramps: There is no BIS available for this device at present. Further it cannot replace a regular ramp. However, depending upon availability of space best practices, available in few hospitals may be adopted.

Mist Sprinkler system : The National Building Code of India in 'Fire and Life Safety' prescribes in Automatic Sprinkler system and Water Mist system which are well defined there in and the same are recommended by Tamil Nadu Fire and Rescue Service depending upon requirements.

Automatic Sprinkler system - A system of water pipes fitted with sprinkler head at suitable intervals and height and designed to actuate automatically, control and extinguish a fire by the discharge of water.

Water Mist system - A distribution system connected to a pumping and water supply system that is equipped with nozzles capable of delivering water mist to the part / entire enclosure or area, intended to control, suppress, or extinguish fire and is capable of meeting the specified performance requirements.

Fibre Glass Stretchers : In other words, Spine Board Stretchers which are latest / modern stretchers are readily available in the market.

Fire Extinguisher Ball : Fire Extinguisher Ball is a fire suppressant packaged in a compact and lightweight ball that self-detonates in 3 to 5 seconds when it comes into contact with fire and disperses non-toxic chemicals to extinguish the flames in an area with a radius ranging between 86 to 107 square feet. The Fire Extinguisher Ball is an affordable fire extinguishing solution that is user-friendly.

dr_vbs@rediffmail.com

Greetings from the office bearers of FSS of IMA TNSB,

Our FSS office in Tiruvannamalai was officially inaugurated on 27.04.2025 morning by our State President Dr.P.Senguttuvan in the presence of Dr.B.Sridhar State president elect, Dr.K.M.Abul Hasan Imm.State President, Dr.S.Karthick Prabhu, State Secretary Dr.K.Prakasam FSS Trust board Chairman, Dr.S.Gowrishanker State Finance Secretary, FSS Chairman Dr.S.Balagan Raja and FSS IAC Chairman Dr.A.Dunston Ramesh.

The Internal Audit Committee of FSS was held on 27.04.2025 at our office in Tiruvannamalai. I thank Dr.A.Dunston Ramesh – IAC Chairman, Dr.Saravanan IAC member. On our side FSS Chairman, Dr.S.Balagan Raja, myself, Dr.K.Kamala Kannan FSS Past Secretary and Dr.V.Barathiselvan present Finance Secretary took part,

On 29 April 2025 IMA Cheyyar branch invited me as a Chief guest and speaker to promote FSS among their members. It was arranged by Dr J Senthil Kumar PPLSS Chairman and Senior leader of IMA Cheyyar. After the meeting. Around 8 to 10 members showed interest in becoming FSS members and two of them submitted their application for membership form on the same day Dr Ravi Kanchipuram. MA president too attended the function Dr.Gandhimathi president and Dr. Keerthi secretary arranged the function

I appeal to all the eligible members **PARTICULARLY BRANCH OFFICE BEARERS AND STATE COUNCIL** members to who haven't enrolled so far in FSS to do it immediately to pass on the financial support to your **COLLEAGUE'S FAMILY WHEN THEY ARE IN IRREPLACEABLE LOSS.**

FSS I : The New Membership in FSS I during April 2025 is 6 and our Active membership as on April 30th 2025 is 9002. We have settled 4 Claims in during April month and right from 2004 till date we have settled **1318 Claims and have paid a sum of Rs.220.60 crores** to their individual families. **In April 2025 628 members paid 31st AFC Collection is Rs.20,200/-.** Till 13th May '25 around 6638 members have already paid their dues that is almost 69%. We have a fixed deposit of Rs.8.09 crores FD in NRD account and Rs.6.30 Crores in AFC.

FSS II : As have started dispersing the claim amount in FSS II by DFC Method of Calculation i.e. Rs.300 x (Active membership). The claim amount is **Rs.8,75,400/-**. We had 3 claims in FSS II during the month of April '25 and we paid Rs.8,75,400/- each. we have settled 17 Claims in FSS II in the 7th AFC. Right from 2018 till date we have settled **252 Claims and have paid Rs.18.90 Crores** to their individual families. We have a fixed deposit of Rs.22.24 crores FD in NRD account and Rs.7.92 Crores in AFC. And **179 members** are yet to pay their 7th AFC. From APR 1st onwards they need to pay Rs.11,100/-. **7th AFC deletion date is June 30th 2025.** So I request all the FSS II members also the Management committee members to take special interest in reminding them about the dues and to pay the 7th AFC amount as early as possible. **We should achieve nil deletion this time.**

Whichever mode you pay the AFC amount i.e. by online/DD/Cheque/UPI QR code... You could download the receipt and take a printout by logging into our website www.imatnsbfss.com

With regards, Yours sincerely

Respected Seniors, Dear Friends,

As informed our team is working towards correcting the members details in our PPLSSS directory.

Membership list with phone number and mail id details were sent to District coordinators , Branch presidents and secretaries. I request all PPLSSS Members to verify the details and update if necessary. Kindly inform us in case the list was not received.

The 109th Management committee meeting was conducted on 10th May 2025 in Kanyakumari.

68 members(IMA TN Leaders, Office bearers of IMA TN and PPLSSS IMA TN) had attended the meeting. Thanks to the organising team including Dr.Thiraviyam Mohan, IMA FSS Chairman Dr. Balagan Raja , Dr. Solomon Jaya and local IMA Branch leaders for their Dedication, Involvement and Excellent Hospitality.

We are grateful to all those who took time and joined us for a constructive meeting and proper guidance.

As per our PPLSSS bye laws ,No claim bonus will not be given if renewal is done after 30 days of the Renewal date. After 90 days if renewal is done continuity will be lost and new Number will be allotted. Reminders will be given by Registered post as well as in TIMA news letter.We request all our members to Renew within time.

In the past three months we had received 22 lawyer notices and 25 court notices. We had won 24 cases and lost 4 . Appeal was made for 2 cases in the state forum (which we lost in the district forum). I thank our Legal committee members and Panel Advocates for their wonderful job .

Kindly check for completeness of case sheets including relevant and proper consent form. Ensure proper communication and Documentation of the communication for a Hassle free practice.

**LONG LIVE IMA.

FIRST TIME IN hennai

Introducing
O-ARM for
Brain, Spine & Ortho Surgeries

- Ultimate surgical precision like never before with O-Arm's AI enhanced 2D and 3D imaging technology
- Enhanced surgical accuracy and patient outcomes with real-time navigation
- Facilitates minimally invasive approaches by providing detailed spatial orientation
- Real-time verification of implant positioning and spinal alignment

Spine Procedures

- Spinal Fusion (Cervical, Thoracic, Lumbar)
- Scoliosis Correction & Deformity Surgeries
- Disc Replacement / Discectomy
- Laminectomy / Laminoplasty
- Spinal Tumor Resection
- Spinal Fracture Stabilization

Neuro Procedures

- Navigation-Assisted Cranial Surgeries
- CSF Leak Repairs (Complex Skull Base Access)
- Intramedullary Tumor Resection
- Foramen Magnum Decompression
- Navigation in Deep-Seated Brain Lesions
- Cranial Trauma

Ortho Procedures

- Pelvic Fracture Fixation
- Complex Long Bone Fracture Repairs
- Acetabular Reconstruction
- Periarticular Fractures with Complex Geometry
- Revision Total Hip or Knee Replacement
- Bone Tumor Resection with Precision Margins
